

Henry Gas Storage, LLC, (HGS) a subsidiary of Ranger Gas Storage LLC, is proposing the development of an underground natural gas storage facility on Cote Blanche Island in St. Mary Parish, Louisiana, and the construction of a 12-mile natural gas pipeline to connect with interstate and intrastate natural gas pipelines in the area.

The project represents a \$500 million investment over four years in St. Mary Parish that will provide more than 1,600 construction jobs and about 20 permanent jobs, with an average annual salary of approximately \$70,000, plus benefits. Overall impact to the Louisiana economy is estimated at \$737 million in new business sales, more than \$241 million in new household income and \$35 million in new state taxes over a 10-year period, according to a recent economic impact study by economist Dr. Loren C. Scott, Professor Emeritus of Economics at Louisiana State University.

HGS is committed to the highest standard of safety and environmental protection for employees, industrial neighbors and the community. The project will be developed in accordance with all federal, state and local regulatory requirements. The Federal Energy Regulatory Commission (FERC) will have primary responsibility for overseeing the permitting and construction of the storage facility. Natural gas has been stored safely in salt caverns for more than 50 years in many parts of the country and the industry has an outstanding safety record.

As part of the FERC approval process, HGS will continue to share information with the St. Mary Parish community, including maintaining up-to-date information on the company Web site, placing notices in local newspapers and holding one or more open houses. HGS values its relationship with the residents of St. Mary Parish and is dedicated to being an active community partner.

Henry Gas Storage, LLC is a subsidiary of Ranger Gas Storage, LLC a three-year-old partnership between industry veterans with more than 150 years of combined energy industry experience, including the development, construction, operation and management of storage and energy facilities in Louisiana.
